RCS AIRdesign Completes Airport Prototype for Papa John's International

DENVER, March 02, 2009 - RCS AIRdesign has recently completed a new QSR prototype design for Papa John's International. This prototype was created specifically for stores built in airports and designed to meet the unique requirements for the airport concessions market. Two general schemes were developed - one for food court environments and one for Inline environments, with each scheme ranging from 500 s.f. to 1,500 s.f.

Prototype services provided were comprehensive and addressed analyzing opportunities and constraints of the design within typical airport environments. Other specific services provided included programming, site evaluation, project budgeting, concept design, materials selection, environmental signage, sustainable design analysis, lighting analysis, and materials specifications.

Images are available upon request.

RCS AIRdesign, based in Denver, is a full service consulting and architectural firm with more than 15 years experience in providing a variety of services to the airport concessions industry. Founded in 1995 as an extension of RCS Design / Planning / Consulting, RCS AIRdesign is fully dedicated to bringing its clients knowledgeable insight, quality design, and thorough project management.

RCS AIRdesign is a founding member of the Airport Concessions Team strategic alliance.
