FROM: ROBERT SCHMID
SUBJECT: ACT PRESS RELEASE

FOR IMMEDIATE RELEASE:

KLIPP JOINS AIRPORT CONCESSIONS TEAM

On 10/01/2008 klipp became the newest member of the Airport Concessions Team (ACT)

Founded in 1979, klipp is a Denver-based architecture firm specializing in commercial, educational, and public projects. klipp provides a full range of services including design, planning, architecture, and interior design. klipp will be providing design concepting and technical documents services in support of the marketing efforts by ACT managing partner firms, with services being offered to airport concessions clients throughout the US.

The addition of klipp will bring to five, the number of member firms of ACT. ACT was founded in November 2000 as a strategic alliance of two architectural firms with over 20 years of combined experience in providing architectural services to the Airport Concessions industry. ACT's mission is to provide quality architectural design services to the Airport Concessions industry through partnering associations with other ACT members to address specific project requirements. Providing a scope of service that recognizes the unique differences in airport concessions project development, ACT members share the same goal of providing a well-designed project, on time and within budget.

Since 2000 three additional firms have joined the ACT Strategic Alliance in a design support role to further strengthen ACT's commitment to the Airport Concessions Industry by providing a superior comprehensive Scope of Services on a national basis. Currently ACT members have over 30 years of combined airport concessions experience.

ACT managing partner firms are RCS AIRdesign and ARC International. ACT member firms providing design and technical project support are; insitu DESIGN, Cowperthwaite Architecture, and klipp.
